Art Unit: 2623

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Applicant's Arguments, filed 9/25/2006, with respect to the rejection(s) of claim(s) 1-3, 6-11, 14-19 and 22-24 under 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, upon further consideration, a new ground(s) of rejection is made in view of Ellis ('208 Patent Application Publication) in view of Ellis ('926 Patent).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-3, 6-7, 9-11, 14-15, 17-19 and 22-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis et al. (U.S. Patent Publication Application No. 2005/0028208) in view of Ellis et al. (U.S. Patent No. 6,774,926).

Referring to claim 1, Ellis discloses receiving EPG selection entered over the Internet via a remote device (see Paragraphs 0014-0016).

Ellis also discloses storing the EPG selections on a storage device (see Paragraph 0072 for the remote program guide access device storing the EPG data).

Art Unit: 2623

Ellis also discloses transmitting the EPG selections to be displayed when requested (see Paragraph 0016 for making program selections remotely, which will be displayed on the TV).

Ellis is silent as to the EPG selection being entered via a web-enabled cellular phone.

Ellis ('926 Patent) discloses a cellular phone 42 with display 100, wherein the display 100 is used to display and select EPG items (see Column 7, Lines 18-26 and Column 8, Lines 60-67).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to combine the systems of Ellis and Ellis ('926 Patent) in order to provide a system capable of utilizing a mobile phone having EPG capability as a remote controller, thereby providing the user with extended functionality and control and allowing the user to reserve programs from remote locations. Also note that Ellis ('926 Patent) specifically states that an advantage to the system allows the cell phone to access the schedule information and perform various functions, such as searching for programming of interest, establishing favorite programs, setting reminders and setting parental controls (see Column 1, Lines 40-46).

Referring to claims 2 and 3, Ellis discloses storing EPG selections on a broadcast server and set top box (see Paragraph 0017 and Figure 2).

Art Unit: 2623

Referring to claim 4, Ellis further discloses the remote terminal can be a PDA (see Paragraph 0092).

Referring to claim 6, Ellis further discloses that the system displays EPOG selection on the remote terminal when requested (see Paragraph 0015).

Referring to claim 7, in light of the combined disclosures used to rejection claim 6, claim 7 would be an obvious variant. Transmitting EPG data to multiple remote terminals is obvious in light of the disclosure of Ellis already teaching transmittal to one remote terminal.

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the teaching of Ellis is order to provide multiple separate devices, thereby allowing multiple users to utilize the system concurrently.

Referring to claims 9-11 and 14-15, see the rejection of claims 1-3 and 6-7, respectively.

Referring to claims 17-19 and 22-23, see the rejection of claims 1-3 and 6-7, respectively.

3. Claims 8, 16 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis et al. (U.S. Patent Publication Application No. 2005/0028208) in view of Ellis

Art Unit: 2623

et al. (U.S. Patent No. 6,774,926) in further view of Terakado et al. (U.S. Patent No. 6,246,441).

Referring to claim 8, Ellis and Ellis ('926 Patent) disclose all of the limitations of claim 6, but are silent as to transmitting one or more programs to be separately displayed concurrently with displaying the EPG selections.

Terakado discloses (in the same field of endeavor) a similar system which is capable of allowing a user to view a program broadcast on the television while concurrently viewing the EPG data on the remote terminal (see Column 9, Lines 47-53).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the systems of Ellis, using the teachings of Terakado in order to provide a system capable of allowing a user to watch a broadcast program on the television receiver 9, while checking programs to be broadcast from a time onward by using an EPG without obstructing the display of the television receiver 9 (see Column 9, Lines 50-53 of Terakado).

Referring to claims 16 and 24, see the rejection of claim 8.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason P. Salce whose telephone number is (571) 272-7301. The examiner can normally be reached on M-F 9am-6pm.

Art Unit: 2623

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Miller can be reached on (571) 272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
